

ABOUT US

Sampangi is not a company, it is an emotion, a belief, an assurance, a tradition, a culture, a way to a quality life. Agriculture, which is India's culture is also Sampangi's culture. We have chosen our culture as Agriculture We are into Real Estate, Bio farming, Hospitality, Bio technology, entertainment, infrastructure, exports & imports across the globe. Sampangi is the largest producer of Dates and is one of the richest companies in nature based agriculture in India Our primary responsibility for the one who is part of Sampangi, is to provide health, wealth and happiness to them and their future generations Bio-farming: We hold a major cultivation of dates palm trees in 300 acres which is biggest in India. Under bio-farming, we cultivate the date palm trees and other internal plantation in organic manner and supply them our clients and various markets Real estate:

We are into real estate projects like gated community apartments, villa projects and gated community villa plots Infrastructure: We do take care government infra projects like roads, Railway projects and handover them on time Bio-technology: We, Sampangi group are part of technical farming. We have our laboratories wherein we develop tissue culture methods of Banana and Dates. The plant tissues are being developed and are grown for better yield and highest health benefits. We have banana and dates tissue culture laboratories Entertainment: We are part of filmmaking. We have produced multiple films Import & export: The produced yields from our farms are packed and are exported to different states and countries under our licensed firm named, MANA PANTA. We as Sampangi are entitled to provide you with Health, wealth and happiness to you and to your future generations

Bio-farming:

Bio-farming is termed as an agricultural process that uses biological fertilizers acquired from animal/plant waste Bio-farming is also called as the biological farming/organic farming. It repairs, maintains and improves ecological balance Need for bio-farming: Highly nutritional, Good returns on investment, High demand and environment friendly

We Will Cultivate Either **Taiwan Jamun (or) Dragon Fruits.**

ABOUT TAIWAN JAMUN

Taiwan Jamun, also known as Java Plum or Black Plum, is a tropical fruit scientifically named *Syzygium cumini*. It is native to the Indian subcontinent and Southeast Asia. The fruit is typically dark purple or black when ripe and has a sweet and slightly tangy flavor.

ABOUT DRAGON FRUIT

Dragon fruit, also known as pitaya or pitahaya, is a tropical fruit known for its vibrant red or yellow skin and sweet, seed-speckled pulp. It's native to Central America but is now grown in various tropical and subtropical regions around the world.

DATE PALM CULTIVATION

- We Sampangi Group, Started Modern way of Cultivating Date Palm in 300 acres with Certified Agri Consultant near Narayankhed , Sangareddy (dist) .

ABOUT DATES

- Dates are delicious and the most Nutritious Fruit that grow on the planet Earth. They are widely consumed through the world and hold high value in many cultures and religious. It contains high fabric and sugar content.

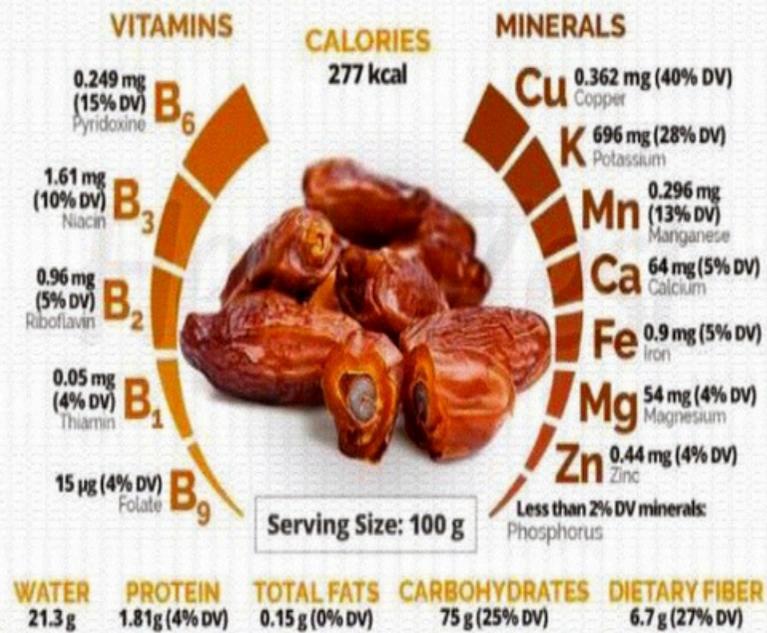

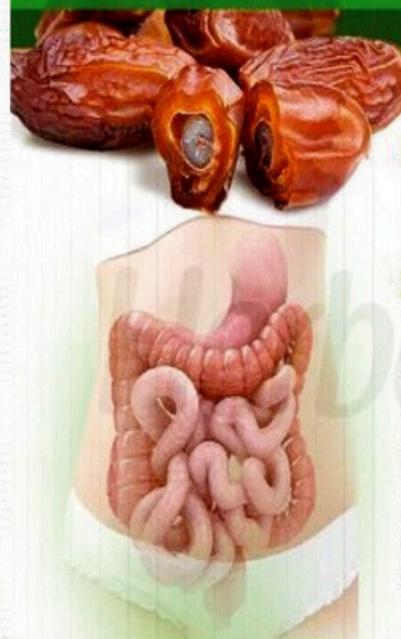

HEALTH BENEFITS OF DATES

- Dates are highly nutritious.
- Dates are rich in vitamins, fiber, carbs and other nutrients which makes the date fruit one of the healthiest fruits.
- Reduces the risk of cancer.
- Helps in improving the Fertility among Males and facilitates natural labor.
- Relieves Constipation & Regulates Bowel movements.
- Controls Diarrhea and helps fight Diabetes.
- Reduces Blood Pressure and improves Brain functionality.
- Promotes Respiratory & Digestive health.
- Can protect your kidneys.
- Promotes Bone Health.
- Adds strength to your nervous system.
- Reduces the rate of Hair loss and Improves your Skin and helps with Anemia.

Dates Nutrition

Dates Benefits & Properties

Digestive, Nutritious

Main Applications

- Relieving constipation
- Controlling blood sugar levels

Supportive Compounds

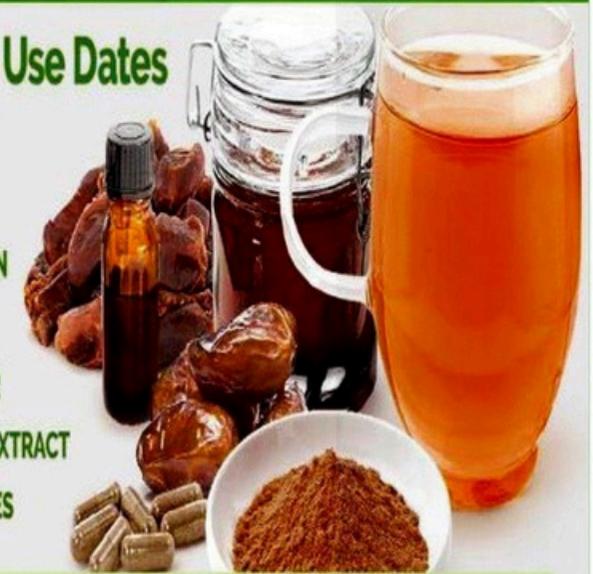

- Sucrose
- Fatty acids (mainly palmitic acid)
- Phenols
- Phytoestrogens

Medicinal Actions

The high amounts of **dietary fiber**, **potassium**, and **sucrose** in dates are thought to be responsible for stimulating gastrointestinal activity and promoting regular bowel movements. On the other hand, scientific studies suggest that a combination of **phenols**, **fatty acids**, and **phytoestrogens**, improves insulin resistance, stabilizing blood sugar levels in people with type 2 diabetes.

How to Use Dates

- FRESH
- DRIED
- INFUSION
- SYRUP
- POWDER
- LIQUID EXTRACT
- CAPSULES

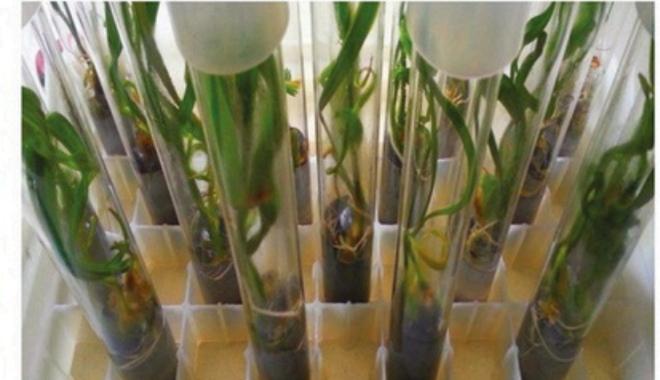

Did you know?

Dried dates have the **second highest levels of phytoestrogens** in fruits, after dried apricots. Phytoestrogens have proven to be useful in the prevention and management of **type 2 diabetes**.

Tissue Culture Plants

Both Female & Male Plant Price: Rs6,500/-X80=5,20,000 per 1Acre.

PROCESS OF TISSUE CULTURE:

Plant Material

**Complete Inflorescence
(30-40cm)**

**Inflorescence
Explants (1 cm)**

Explants in Medium

**Somatic Embryo
Proliferation**

Plantlet Regeneration

Callus Formation

Callus Proliferation

White Callus

Plantlet Elongation

**Medium used for establishment
of proper rooting system**

GROWTHCYCLE OF DATE PLANT

WHY....! DATE CULTIVATION:

- India Imports 5 lakh metric tons of Date Fruits every year from Gulf countries.
- As per Demand & Supply, Supply is very less and there is an increased demand of Dates consumption on daily basis.
- Though we are cultivating lakhs Hectares, we are unable to meet up the “Supply” “Demand” gap.
- Date fruit has more Medicinal properties with Low Glycaemic Index, so Diabetics patients also can consume it.
- Even Doctors recommend using Date Syrup instead of Sugar adding in the milk to infants for better health.
- It can even be used in Coffee & Tea due to the availability of original Honey.

5 Gunta / 605 sq.yrds.

- **We will cultivate 10 date plants in each 5 Gunta of land in that 09 are Female and 01 are Male.**
- **The income will start from 4th year onwards after the completion of the plantation.**
- **The cultivation of Tissue culture and its life span is 120 years and the yield is for 80 years**
